

Flexible Learning Business Planning Framework

What is the Flexible Learning Business Planning Framework?

The Flexible Learning Business Planning Framework supports the development and delivery of effective and sustainable flexible delivery solutions. It will help you to investigate a range of issues associated with the delivery of flexible learning.

The Flexible Learning Business Planning Framework features five sections:

1. **Strategic Directions** – provides you with an understanding of the strategic directions for developing flexible delivery.
2. **Business Case** – focusses on assessing the market's requirements and the viability of flexible delivery solutions.
3. **Solution Promotion and Development** – helps you to develop and promote flexible delivery solutions.
4. **Solution Delivery and Evaluation** – helps you to deliver and evaluate flexible delivery solutions.

5. **Learning and Improvement** – focuses on how to identify and implement opportunities.

"A great planning tool. Use it to guide strategic planning or just dip into the great 'reality check' questions for each area. There's something for anyone wanting to deliver flexibly. It won't do the job for you but it will help you get it right."

**Frankie Forsyth, Pelion Consulting,
Tasmania**

How will the Framework help me?

The Flexible Learning Business Planning Framework provides you with a logical and hands-on approach to successfully develop and implement flexible learning initiatives.

It can help you to examine current training outcomes, use the real-world scenarios to help with business planning, or apply the change-management strategies when you implement flexible learning in your organisation.

Flexible Learning Business Planning Framework

It also provides answers to key questions that need to be addressed when introducing flexible learning into an organisation.

"...using the product's step-by-step approach to developing a flexible learning framework enabled the online community to work through a basic strategy, as a basis for further developing the business case study. The model provided a comprehensive means of analysing all factors involved in the development and delivery of sustainable flexible delivery solutions."

**Paul van Hauen, Central Coast Health,
New South Wales**

What does it cost and where do I find further information?

The Flexible Learning Business Planning Framework is **FREE**.

Simply visit flexiblelearning.net.au/productsand services/businessplanningframework.htm to access the Framework and other valuable resources such as links to other business planning models and sites.
